### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 15 January 2007.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. There are two inventions present:

Group 1, claims 1-15, drawn to a laser processing method (classified in class 438, subclass 463+); and

Group 2, claims 16-19, drawn to a semiconductor chip (classified in class 257, subclass 618+).

The inventions listed as Group 1 and Group 2 do not relate to a single general inventive concept under PCT Rule 13.1 and 13.2, because they lack the same or corresponding special technical feature(s). A technical feature common to both Group 1 and Group 2 is a laminated substrate having rows of first modified regions and a row of second modified region extending from a rear face of the substrate, the second modified region is positioned between the first modified region (closest to the rear face of the substrate) and the rear face of the substrate. The substrate having the rows of first modified regions and the row of second modified as described above cannot be a

special technical feature under PCT Rule 13.2, because the element is well known in the art. US PG Pub No. 2007/0170159 A1 to Fukumitsu teaches a laminated substrate having a rows of first modified regions 201 through 205 and a row of second modified region 206 that is positioned between the first modified region 205 and the rear surface of the substrate.

Since there is a lack of unity *a posteriori* between Group 1 and Group 2, the Applicant is required to elect either Group 1 or Group 2.
